About Me

Growing up, I always envisioned myself as a painter. An artist unendingly devoted to spilling painted passions on canvas, and then I wrote my first “Hello world”. Computers replaced canvases and code became my paintbrush, I’ve never looked back. I’m completely captivated by the world of software development, it’s a field that provides continuous opportunities to face challenges and sharpen my skills as a developer. I’m beyond excited to pursue my passion and craft software I can be proud of.

SKILLS

- C++
- Javascript
- HTML & CSS
- mySQL
- Python
- React JS
- Node.js
- Bootstrap
- Front-end development
- Software Engineering

EXPERIENCE

June 2020

RamirezGarza.com

Personal Site

Built a personal site using React.js and Sass. The site features parallax scrolling and an interactive navigation bar. It will be further developed into a portfolio site.

Sept. 2018 - Present

University of North Texas, Denton, TX

Metadata Cataloger

I populated UNT’s library website with information on digitized theses and dissertations, such as research summaries and metadata tags, increasing the usability and findability of the papers. I also populated the school’s library database management system with the same information.

EDUCATION

May 2020

University of North Texas, Denton, TX

Bachelor of Science in Computer Science

Relevant Coursework

Software Engineering, Internet Programming, Secure E-Commerce, Computer Networks, Database Systems, Technical Writing, Linear Algebra
